General discussion

WMS Best Practices

- In final stages
  - Please read and comment!!!
- We need implementations!!!
- June 2013 - EGOWS OGC session including interoperability testing

Key issues

- Temporal description
- Co-ordinate systems

- Gets addressed by separate groups
- Important for many standards

General comments

- We need to push our Use Cases for future standard versions!
  - Get in early in the standard process
- Your are only truly interoperable if you test your servers with different clients
- Good to have different technical implementation
- Meta data granularity?
  - Action to WMO task team
